## GUIDE SERIES TACKLE BAGS AND WRAPS

Due early 2020

New for 2020, Plano's Guide Series range has never looked or functioned better. Each model features hard-backed 1680 Denier fabric that will hold its colour and shape for years. Additional upgrades include laser-cut MOLLE attachment points; redesigned pocket configurations for improved access and comfort; oversized zippers that open with ease; and the bags have an all-new TPR molded base with extra rigidity and gripping power. But here's what we're really excited about. Each tackle bag features a patent-pending magnetic Dropzone™ on top of the lid that keeps your favourite bait and tools within grabbing distance. This is a revolutionary innovation exclusively from the minds of Plano engineers, and the Guide Series bags are the first to see it come to life.

**FINS FIGHTER PRT BRAID** *In stock now*

FINS Fighter PRT differs from the original PRT in that we have improved the resin system which is applied as well as the method to apply it. This results in a rounder more abrasion resistant product that has a better strength to weight ratio than the Original PRT. Fighter PRT also is somewhat firmer (without being stiff) allowing for better performance in regards to casting distance and reduces the chances of getting rod tip wrapping. Features include 100% Spectra Fiber, high strength durability and is ideal for all tough and predatory fish.

## TASMANIAN DEVIL MONO LINE *In stock now*

The Tasmanian Devil Mono range of lines are supple and are processed with real camouflage effect that imitates silt and plankton floating in water; moreover, the brownish 3D captures natural essence of chameleon. When you have the line above water, fluorescent glitter helps you trace its direction easily, but the part in the water where light penetration becomes less, the line turns brown with less reflection. This unique line has excellent knot strength and the coil memory and shock-resistant performance is improved making it suitable as reel mainline and as leader.

## TASMANIAN DEVIL LEADCORE LINE

Tasmanian Devil Leadcore is an innovative line that allows a lure or fly to be trolled at varying depths without the aid of a paravane or trolling sinkers. The leadcore trolling line is constructed from tightly braided nylon multifilament woven over a core of pure lead resulting in a fine diameter line with high visibility colour metering every 10 yards. The colour metering makes it easy to monitor the depth being fished.
